HELP US HELP YOU

Read this guide carefully.

It is intended to help you operate and maintain your new water dispenser properly.

Keep it handy to answer your questions.
If you don't understand something or you need more assistance please call:

Avanti Customer Service

800-220-5570

Keep proof of original purchase date (such as your sales slip) with this guide to establish the warranty period.

Write down the model and serial numbers.

You'll find them on a label located on the back side of the unit.

Please write these numbers here:

_____
Date of Purchase

_____
Model Number

_____
Serial Number

Use these numbers in any correspondence or service calls concerning your water dispenser.

If you received a damaged water dispenser, immediately contact the dealer (or builder) that sold you the water dispenser.

Save time and money. Before you call for service, check the Trouble Shooting Guide. It lists causes of minor operating problems that you can correct yourself.

IF YOU NEED SERVICE

We're proud of our service and want you to be pleased. If for some reason you are not happy with the service you receive, here are some steps to follow for further assistance.
FIRST, contact the people who serviced your appliance. Explain why you are not pleased. In most cases, this will solve the problem.

NEXT, if you are still not pleased, write all the details, including your telephone number, and send it to:

Customer Service
Avanti Products
10880 NW 30 Street
Miami, FL 33172

3	Hot Water Faucet (With Child Safety Guard)	7	Removable Drip Tray
4	Cold Water Faucet	Back Panel	Hot and Cold Water System Power Switches Drain Plug

Important Safety Instructions

⚡ WARNING ⚡	To reduce the risk of fire, electrical shock, or injury when using your appliance, follow these basic precautions:

- Read all instructions before using the water dispenser.
- Never clean parts with flammable fluids. The fumes can create a fire hazard or explosion.
- Do not store or use gasoline or any other flammable vapors and liquids in the vicinity of this or any other water dispenser. The fumes can create a fire hazard or explosion.

-Save these instructions-

INSTALLATION GUIDELINES:

- Remove the exterior and interior packing.
- Place your appliance on a countertop or surface that is strong enough to support the dispenser when it is fully loaded. The unit is provided with four plastic feet, if it does not sit level on the floor, adjust the front feet to level the unit well to the floor.
- Locate the appliance away from direct sunlight and sources of heat (stove, heater, radiator, etc.). Direct sunlight may affect the acrylic coating and heat sources may increase electrical consumption. Extreme cold ambient temperatures may also cause the appliance not to perform properly.
- Allow 5 inches of space between the water dispenser and the wall, which allows for proper air circulation to cool the compressor.
- Plug the appliance into an exclusive properly installed-grounded wall outlet. Do not cut or remove the third (ground) prong from the power cord under any circumstances. Any questions concerning power and/or grounding should be directed toward a certified electrician or an authorized Avanti Products service center.
- This water dispenser is not recommended for outdoor use.
- Do not locate the dispenser in area where the temperature may fall below freezing (32º F).
- Keep area around dispenser free of dust and dirt.
- Keep the reserve supply of water bottles away from excessive heat and light.
- Never unplug the water cooler, except for maintenance.

➢ ELECTRICAL CONNECTION

Warning

Improper use of the grounded plug can result in the risk of electrical shock. If the power cord is damaged, have it replaced by an authorized Avanti Products service center.

This appliance should be properly grounded for your safety. The power cord of this appliance is equipped with a three-prong plug which mates with standard three prong wall outlets to minimize the possibility of electrical shock.

Do not under any circumstances cut or remove the third ground prong from the power cord supplied. For personal safety, this appliance must be properly grounded.

This appliance requires a standard 115/120 Volt AC ~/60Hz electrical ground outlet with three-prong. Have the wall outlet and circuit checked by a qualified electrician to make sure the outlet is properly grounded. When a standard 2-prong wall outlet is encountered, it is your responsibility and obligation to have it replaced with a properly grounded 3-prong wall outlet.

The cord should be secured behind the appliance and not left exposed or dangling to prevent accidental injury.

The appliance should always be plugged into its own individual electrical outlet which has a voltage rating that matches the rating label on the appliance. This provides the best performance and also prevent overloading house wiring circuits that could cause a fire hazard from overheated. Never unplug the appliance by pulling the power cord. Always grip the plug firmly and pull straight out from the receptacle. Repair or replace immediately all power cords that have become frayed or otherwise damaged. Do not use a cord that shows cracks or abrasion damage along its length or at either end. When moving the appliance, be careful not to damage the power cord.

➢ EXTENSION CORD

Because of potential safety hazards under certain conditions, it is strongly recommended that you do not use an extension cord with this appliance. However, if you must use an extension cord it is absolutely necessary that it be a UL/CUL-Listed, 3-wire grounding type appliance extension cord having a grounding type plug and outlet and that the electrical rating of the cord be 115 volts and at least 10 amperes.

➢ SURGE PROTECTOR

Most electrical appliances use a series of electric control boards to operate. These boards are very susceptible to power surges and could be damaged or destroyed.

If the appliance is going to be used in an area or if your city / country is prone to power surges / outages; it is suggested that you use a power surge protector for all electrical devices / appliances you use. The surge protector that you select must have a surge block high enough to protect the appliance it is connected to. If you have any questions regarding the type and size of surge protector needed contact a licensed electrician in your area.

Damages due to power surges are not considered a manufacturer covered defect and will void your product warranty.

OPERATION INSTRUCTIONS:

Before Using Your Water Dispenser

- Check to be sure the following parts are included:
  - Instruction manual
  - 2 extra cup dispenser cabinet plugs
  - 2 extra drain seals
  - Accessories order form.

- Before connecting the appliance to the power source, let it stand upright for approximately 2 hours. This will reduce the possibility of a malfunction in the cooling system from handling during transportation.
- The water dispenser is pre-cleaned at the factory but the reservoir and water lines must be flushed with fresh water before use as follows:
- Keep the unit unplugged.
- Fill water tank with tap water full to capacity. Wait for 5 minutes until water settles.
- Slide child safety button then push the hot water faucet until water comes out, then stop.
- Plug the dispenser into the electrical outlet. We are ready to complete the first cycle. In order to do that, wait for the hot water to reach temperature in approximately 10 minutes, and then wait for the cold to reach temperature (another 40 minutes, approximately).
- Unplug the dispenser from the electrical outlet. Proceed to drain the water from the faucets one at a time until no more water remains.
  (Note: To facilitate this operation, use a large container).
- Then, drain any water left in the tanks by opening the drain plug located on the back, until it drains completely.
- Proceed to close the drain cap.
- Remove the cap from the 5-gallon bottle and use a clean cloth to wipe off the neck of the bottle.
- Place the 5-gallon bottle of water on the water intake, allow water to stand for approximately one minute.
- Push water faucet buttons to insure water flows from both faucets.
- Plug dispenser back into the electrical outlet.
- Now you are ready to use your water dispenser.

NOTE: Your water dispenser has been cleaned and sanitized before leaving the factory, but in case a taste problem develops, place two tablespoons of baking soda and add tap water. Fill water tank again and repeat basic operations previously outlined, except turn hot water switch “OFF” to avoid leaving residues in hot water tank.

ATTENTION:

If you do not plan to use the water heating function for more than three days, we recommend that you turn off the hot water function.

WARNING

IMPROPER USE OF THE GROUNDED PLUG CAN RESULT IN THE RISK OF ELECTRICAL SHOCK. IF THE POWER CORD IS DAMAGED, HAVE IT REPLACED BY AN AUTHORIZED AVANTI PRODUCTS SERVICE CENTER.

OPERATING YOUR WATER DISPENSER

Steps To Replace Water Bottles

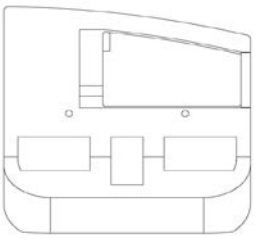
- Remove cap.
- Use a clean cloth to wipe off neck of bottle.
- Carefully lift bottle (approx. 40 lbs.) using your legs and not your back. Do not place hands on opening of bottle while placing in reservoir.
- Insert the water bottle on the water intake over reservoir opening so it settles properly on it.
- Wipe off any water which may have splashed on dispenser top.

When a new bottle is installed you must open the hot water faucet and remove no less than 4 full cups of water to insure the water flows properly and the water reservoir is at the proper level.

Control and Display Panel

For operation of unit, please fill water and make sure water settles inside the water tank, and then switch on both hot and cold switches at back of unit.

NOTE:
THE HOT WATER FAUCET HAS A CHILD-SAFETY GUARD ATTACHMENT.



To get hot water:

- Slide red safety button to the right and hold while pressing downward on hot water faucet to dispense hot water.
- Safety button will return to its original position when faucet is released.

NOTE:
THE DISPENSING CAPACITY OF HOT WATER IS APPROXIMATELY 2 ½ CUPS AT A SINGLE TIME. ONCE THE MAXIMUM NUMBER OF CUPS HAS BEEN DISPENSED THE RESERVOIR WILL REFILL AND BE READY TO DISPENSE ANOTHER 2 ½ CUPS IN APPROXIMATELY 5 – 6 MINUTES

CARE AND MAINTENANCE

- Wash the inside of the reservoir with a warm water and baking soda solution. The solution should be about 2 tablespoons of baking soda to a quart of water. (Turn off the hot water function).
- The drip tray and water faucets should be cleaned with mild detergent and warm water.
- At regular intervals or once a month inspect the coils located across the back of the dispenser. Vacuum accumulation of dust or clean it with a hard brush.

TAKING DISPENSER OUT OF SERVICE

- If the water dispenser will not be used for a long period of time, unplug the power cord from the wall outlet.
- Turn off the hot water.
- Drain the water through the faucets.
- Drain the water from the tanks by removing the plug from the back of the dispenser.

WARNING—THE WATER COMING OUT OF THE BACK MAY BE SCOLDING HOT.

- Unit should NOT be transported on the units side. Place it upright if possible and cover it with a blanket.

Cup Dispenser (OPTIONAL)

The cup dispenser may be installed by using the mounting holes (covered with plastic caps) located near the top of the right side panel of the cooler. The cup dispenser comes equipped with a mounting bracket and screws and may be ordered by completing the enclosed order form provided with your instruction manual.

PROBLEMS WITH YOUR WATER DISPENSER?

You can solve many common water dispenser problems easily, saving you the cost of a possible service call. Try the suggestions outlined below to see if you can solve the problem before calling the servicer.

TROUBLESHOOTING GUIDE

PROBLEM	POSSIBLE CAUSE
Water dispenser does not operate.	Not plugged in. The circuit breaker tripped or a blown fuse.
Water cooler is not cold enough.	Check to be sure the cold switch on the back is ON. The water dispenser does not have the correct clearances.
Water dispenser hot water is not hot enough.	Check to be sure the hot switch on the back is ON.
Compressor turns on and off frequently.	The room temperature is hotter than normal. The temperature control is not set correctly. The water dispenser does not have the correct clearances.
Vibrations.	Check to assure that the water dispenser is level.
The water dispenser seems to make too much noise.	The rattling noise may come from the flow of the refrigerant, which is normal. As each cycle ends, you may hear gurgling sounds caused by the flow of refrigerant in your water dispenser. Contraction and expansion of the inside walls may cause popping and crackling noises. The water dispenser is not level.
Bottle feels warm.	The water system is overfilled. Dispense Cold water until air is released into the bottle.
Water bottle is hot.	Water is boiling in the hot tank and bubbling up into the bottle. Press the hot dispenser button until water flows to remove air from the hot tank.

SERVICE FOR YOUR WATER DISPENSER

We are proud of our customer service organization and the network of professional service technicians that provide service on your Avanti appliances. With the purchase of your Avanti appliance, you can be confident that if you ever need additional information or assistance, the Avanti Products Customer Service Team will be here for you. Just call us toll-free.

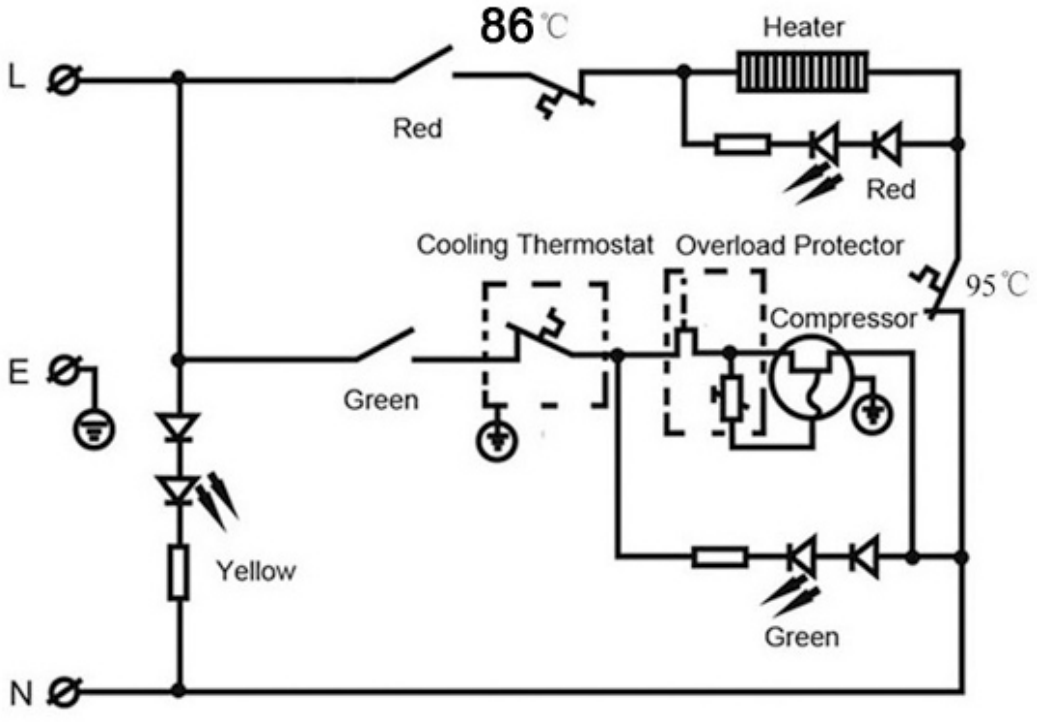
WIRING DIAGRAM



YOUR AVANTI PRODUCTS WARRANTY	Staple your sales receipt here. Proof of original purchase date is needed to obtain service under warranty.

WHAT IS COVERED – LIMITED ONE-YEAR WARRANTY

Avanti Products warrants that the product is free from defects in materials and/or workmanship for a period of twelve (12) months from the date of purchase by the original owner. The foregoing timeline begins to run upon the date of purchase, and shall not be stalled, tolled, extended, or suspended for any reason whatsoever unless described in detail in the warranty document. For one year from the date of purchase by the original owner, Avanti products will, at its option, repair or replace any part of the product which proves to be defective in material or workmanship under normal use. Avanti Products will provide you with a reasonably similar product that is either new or factory refurbished. During this period Avanti Products will provide all parts and labor necessary to correct such defects free of charge, so long as the product has been installed and operated in accordance with the written instructions in this manual. In rental or commercial use, the warranty period is 90 days. All Avanti appliances of 4.2 cubic feet capacity or less must be brought/sent to the appliance service center for repair.

LIMITED SECOND THROUGH FIFTH YEAR WARRANTY

For the second through the fifth year from the date of original purchase, Avanti Products will provide a replacement compressor free of charge due to a failure. You are responsible for the service labor and freight charges. In rental or commercial use, the limited compressor warranty is one year and nine months. Costs involved to move the product to the service center and back to the user's home, as maybe required, are the user's responsibility.

WARRANTY EXCLUSIONS / WHAT IS NOT COVERED:

The warranty coverage described herein excludes all defects or damage that are not the direct fault of Avanti Products, including without limitation, one or more of the following:

- A failure to comply with any applicable state, local, city, or county electrical, plumbing and/or building codes, regulations, or laws, including failure to install the product in strict conformity with local fire and building codes and regulations.
- Any external, elemental and/or environmental forces and factors, including without limitation, rain, wind, sand, floods, fires, mud slides, freezing temperatures, excessive moisture or extended exposure to humidity, lightning, power surges, structural failures surrounding the appliance, and acts of God.

- Content losses of food or other content due to spoilage.
- Incidental or consequential damages
- Parts and labor costs for the following will not be considered as warranty:
  - Evaporator doors, door springs, and/or frames.
  - Inner door panels, door shelves, door rails, and/or door supports.
  - Chest freezer lid liners.
  - Vegetable crispers.
  - Light bulbs and/or plastic housing.
  - Plastic cabinet liners.
  - Punctured evaporator that voids the warranty on the complete sealed system.

- Shipping and handling costs associated with the replacement of the unit.
- Repairs performed by unauthorized servicers.
- Service calls that are related to external problems, such as abuse, misuse, inadequate electrical power, accidents, fire, floods, or any other acts of God.
- Failure of the product if it is used for other than it intended purpose.
- The warranty does not apply outside the Continental USA.
- Surcharges including but not limited to, any after hour, weekend, or holiday service calls, tolls, ferry trip charges, or mileage expense for service calls to remote areas.

In no event shall Avanti Products have any liability or responsibility whatsoever for damage to surrounding property, including cabinetry, floors, ceilings, and other structures and/or objects around the product. Also excluded from this warranty are scratches, nicks, minor dents, and other cosmetic damages on external surfaces and exposed parts; Products on which the serial numbers have been altered, defaced or removed; service visits for customer education, or visits where there is nothing wrong with the product; correction of installation problems (you are solely responsible for any structure and setting for the product, including all electrical, plumbing and/or other connecting facilities, for proper foundation/flooring, and for any alterations including without limitation cabinetry, walls, floors, shelving etc., as well as the resetting of breakers or fuses.

OUT OF WARRANTY PRODUCT

Avanti Products is under no obligation, at law or otherwise, to provide you with any concessions, including repairs, pro-rates, or product replacement, once this warranty has expired.

INSTRUCCIONES EN ESPAÑOL

ADVERTENCIA

EL USO INCORRECTO DEL CABLE A TIERRA PUEDE OCASIONAR UN CHOQUE ELECTRICO. SI EL CORDON ESTA DAÑADO, REEMPLACELO EN UN CENTRO DE SERVICIOS AUTORIZADO POR AVANTI PRODUCTS.

PASOS RECOMENDADOS PARA CAMBIAR EL BOTELLON

- QUITE EL BOTELLON VACIO.
- LIMPIE EL CUELLO DEL BOTELLON NUEVO CON UN TRAPO LIMPIO.
- LEVANTE EL BOTELLON HACIENDO FUERZA CON LAS PIERNAS Y NO LA ESPALDA.
- TOME EL BOTELLON POR LOS LADOS Y DIRIJA EL CUELLO DEL MISMO HACIA LA APERTURA DEL TANQUE.
- VOLTEE EL BOTELLON COMO SI FUERA A BOTAR AGUA E INSERTE EL CUELLO DEL BOTELLON EN LA APERTURA DEL TANQUE HASTA QUE SE COLOQUE EN LA POSICION CORRECTA.
  CUANDO UN NUEVO BOTELLON ES INSTALADO, ABRA PRIMERO EL GRIFO DE AGUA CALIENTE Y DISPENSE UN MINIMO DE 4 TAZAS DE AGUA PARA ASEGURAR QUE EL AGUA FLUYA CORRECTAMENTE Y QUE EL TANQUE DE AGUA ESTE A NIVEL APROPIADO.

DIRECCIONES BASICAS DE OPERACION:

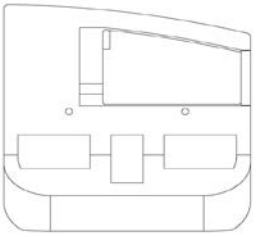
- COLOQUE EL ENFRIADOR DE PIE POR UN PERIODO DE 2 HORAS ANTES DE ENCHUFAR LA UNIDAD A LA PARED.
- COLOQUE EL ENFRIADOR EN UN AREA BIEN VENTILADA Y DEJE UN ESPACIO DE UN POCO MAS DE 5 PULGADAS ENTRE LA UNIDAD Y LA PARED.
- ESCOJA UN LUGAR CON PISO NIVELADO.
- NO COLOQUE EL ENFRIADOR DONDE LA TEMPERATURA AMBIENTAL PUEDA BAJAR DE 32°F (0°C).

ANTES DE ENCHUFARLO

AUNQUE EL ENFRIADOR SALE LIMPIO DE LA FABRICA, DEBE LIMPIAR Y ESTERILIZAR LOS CONDUCTOS DEL TANQUE Y LOS GRIFOS DE ACUERDO A LOS SIGUIENTES PASOS:

- LLENE EL TANQUE DE AGUA (HASTA EL TOPE) CON AGUA DE LA PILA.
- DEJE NIVELAR EL AGUA POR 5 MINUTOS.
- ENCHUFE LA UNIDAD A LA PARED.
- ENCIENDA LOS INTERRUPTORES DE AGUA CALIENTE Y FRIA LOCALIZADOS EN LA PARTE TRASERA DE LA UNIDAD.
- VACIE EL TANQUE COMPLETAMENTE ABRIENDO LA TAPA DE DRENAJE SITUADA ATRAS DEL GABINETE. CIERRELAS. AHORA SU DISPENSADOR DE AGUA ESTA LISTO PARA USAR.

AVISO:
ESTE GRIFO DE AGUA CALIENTE TIENE UN ADAPTADOR DE SEGURIDAD PARA NIÑOS.



PARA OBTENER AGUA CALIENTE:

- MUEVA EL BOTON DE SEGURIDAD HACIA LA DERECHA SIN SOLTARLO.
- MANTENGA AGARRADO ESE BOTON DE SEGURIDAD MIENTRAS QUE EMPUJE EL GRIFO HACIA ABAJO PARA DISPENSAR EL AGUA CALIENTE.
- CUANDO SUELTE EL GRIFO ASEGURESE DE RETORNARLO A LA POSICION ORIGINAL.

NOTA: SU ENFRIADOR FUE LIMPIADO Y ESTIRILIZADO ANTES DE SALIR DE LA FABRICA. EN CASO QUE SIENTA ALGUN SABOR EN EL AGUA, ECHE UNA CUCHARADA DE BICARBONATO DE SODIO Y AÑADA AGUA DE LA PILA. LLENE EL TANQUE Y REPITA LA OPERACION INICIAL.

MANTENIMIENTO

- ANTES DE EFECTUAR LA LIMPIEZA, DESENCHUFE EL ENFRIADOR.
- PARA LIMPIAR LAS PARTES DE PLASTICO SE REQUIERE JABON LIQUIDO Y AGUA TIBIA. NO USE LIMPIADORES ABRASIVOS EN LA SUPERFICIE SUPERIOR NI EN LA BANDEJA DE ESCURRIMIENTO.

SI NO VA A USAR EL ENFRIADOR POR UN TIEMPO PROLONGADO

- DESENCHUFE LA UNIDAD.
- QUITE EL BOTELLON DE AGUA.
- COLOQUE LOS INTERRUPTORES (EN LA PARTE TRASERA) EN LA POSICION “OFF”. (APAGADO)
- DRENE EL AGUA ABRIENDO LAS LLAVES.
- DRENE LA APERTURA EN LA PARTE TRASERA QUITANDO EL TAPON (EN LA PARTE TRASERA).

Registration Information

Thank you for purchasing this fine Avanti product. Please fill out this form and return it to the following address within 100 days from the date of purchase and receive these important benefits:

Avanti Products, A Division of The Mackle Co., Inc.
P.O.Box 520604 – Miami, Florida 33152

- **Protect your product:**
  We will keep the model number and date of purchase of your new Avanti product on file to help you refer to this information in the event of an insurance claim such as fire or theft.

- **Promote better products:**
  We value your input. Your responses will help us develop products designed to best meet your future needs.
